Join us for a technical stem cell seminar

Boston Stem Cell Symposium

Date: Thursday, June 2, 2016

Location: The Charles Hotel
1 Bennett Street, Cambridge MA 02138

Time: 11:00AM - 4:00PM
Lunch and afternoon refreshments will be served.

Overview of agenda

Speaker	Title
Chad Cowan Harvard University, Massachusetts General Hospital	Investigating Metabolic Disease with Human Pluripotent Stem Cells
Laurence Daheron Harvard Stem Cell Institute	"GWAS-in-a-dish": large scale derivation and differentiation of hiPS lines
David Kuninger Thermo Fisher Scientific	Physiologically relevant stem cell derived models for discovery and screening
Kwang-Soo Kim Harvard University, McLean Hospital	Personalized cell therapy for Parkinson's disease
Michael Rukstalis Pfizer Pharmaceuticals	High efficiency differentiation of cardiac and skeletal muscle in a 3D organoid culture
Dana Levasseur Center for Proteomic Chemistry, Novartis Institutes for BioMedical Research	Enabling more predictive disease modeling for lead discovery using patient iPSC derived cardiomyocytes
